

Dear Madam Principal of the local school Nr.3 in Chiwa,

Unfortunately it is not possible for us to write you this letter in your native tongue. We would have done this gladly, because we are still very impressed and touched by the hospitality shown to us by your school during our visit in October 2019.

For this reason we have decided to send this letter to you in three languages – German, English and Russian. We hope that this way it will be possible for you to read our letter and have it translated.

Although you had almost no time for preparations, you made it possible for us to visit your school and meet your teachers and many of your pupils.

We happily accepted this opportunity that was so unexpected for us. During our visit, we saw friendly and open children, hungry for knowledge. The teachers we met were competent professionals who teach their pupils with conviction and love.

We, the board of directors of the Association of School Leaders of North Rhine Westphalia wish to explicitly thank you very sincerely for this experience.

We wish to accompany our thanks with a small sign of our gratitude and support for your school. We have already spoken with your teachers, to discuss a possible contribution and we have already implemented it in Tashkent. We hope this contribution is in your interest.

Our Tour guide will bring a beamer to your school for use in your lessons. We would be very pleased if this could be used for all pupils, especially for the pupils in German lessons.

We wish you and everyone in the local school Nr. 3 in Chiwa all the best, good health and a hopeful future for the education of all.

Yours sincerely,

Dr. Burkhard Mielke
